To Lt. Col. Samuel House:

I am a research assistant at the Guantanamo Testimonials Project at UC Davis under the direction of Professor Almerindo Ojeda, with whom you have corresponded in the past. I wonder if you could point me to statistics regarding the number of hunger strikers in the prison beginning May 2, 2013 to September 24, 2013.

What we would like to know is how many prisoners were classified as hunger strikers each day, how many were under enteral feeding, and how many were under hospital supervision. I have noticed some inconsistencies between statistics as reported in the press and would like statistics from a reputable source for academic purposes. Thank you for your time.

Respectfully,
Nicolai Haddal

Dear Maj. Christian Hodge,

I am a research assistant at the Guantanamo Testimonials Project at UC Davis. I have previously been in contact with LTC Samuel House, who informed me you are his current replacement at JTFGB. We are compiling a complete collection of statistics on the amount of hunger strikers, those on enteral feed, and those observed in the hospital from 3/15-9/24 for academic purposes. LTC House generously supplied me with a collection of these stats. I am only missing a few dates, which we would like to fill out: 3/16-17,3/23-24,3/30-31,4/13-15,4/18,5/1,5/4-7. Thank you for your time.

Dear Maj. Christian Hodge,

I am a research assistant at the Guantanamo Testimonials Project. Thank you very much for your prompt and informative response regarding my request for statistics on the detainee hunger strike last month. Right now I have a fairly complete list ranging from 3/15-9/24, including the number of strikers, enteral feeders, and those under hospital observation. We have found in our research claims that the strike began before March 15th. Are statistics available from before March 15th and after September 24th? Again, thank you for your time.
