

~~SECRET NOFORN~~

Continuation of voluntary sworn statement of

on June 14, 2006

side of the tier. My normal practice is to go down one side then back up the other. I do not like to go back and forth across the tier. I stopped at cell A- because he had a sheet over his head. I tapped lightly on his bean hole and asked him to take down his sheet so I could see his head. He complied with my request. I also stopped at cell A- because he was lying on his stomach. I stayed there for about 45-60 seconds until I could be sure he was moving. When I got to cell A-8, I could see the outline of legs and a torso under a blue blanket, but the detainee had a green mattress up towards the tier blocking the view of his head in the bunk. I noticed another blue blanket hanging up in the corner blocking the sink from my view. I knelt down, but could not see any feet below the blanket. I climbed up some on an empty cell A-7 and saw that a sheet was blocking the view of the corner of cell A-8 where the blanket was hanging. I ran and got M who came back with me and he began to bang on cell A-8. We still got no response. I ran to get (b)(3), (b)(6), (b)(7)(C) was there with him. As (b)(3), (b)(6) and I were running back towards (b)(3), (b)(6) he had opened the bean hole and pulled the blanket off the bunk and started yelling " " which means a suicide. There were towels and clothes on the bunk. (b)(3), (b)(6) went to look inside the window from outside cell A-8 and started yelling "he's hanging, he's hanging". (b)(3), (b)(6) opened the cell door and MA1 and myself rushed into the cell. (b)(3), (b)(6) pulled the blanket down and I saw the detainee hanging fully suspended off the floor of his cell. (b)(3), (b)(6) lifted the detainee up to ease the weight and they couldn't cut the material at first. I pulled at it and got a little slack and they were able to cut it and we got the detainee down out of the cell where we put zip ties on his wrists and ankles, put him on a stretcher and headed out of Alpha block in about a minute and a half. The detainee had urinated on himself and his eyes were wide open and white. The detainee was wearing tan pants and shirt. He was barefoot. I do not remember any bindings around his ankles. The detainee was totally upright against the cell wall between cells A-8 and A-7, next to the sink. NCIS b2

The detainee had his hands bound in front of his body and intricate bindings around his head. I could see his eyes and cheeks, but there was material I believe was from torn sheets across his forehead, and under his chin and over his mouth. There was material jammed into his mouth. (b)(3), (b)(6) told me later he was the one who cut down the detainee. He also checked for pulse, but didn't find any to my knowledge. The detainee from cell A-8 had some light purple on his fingertips. Based on what I observed I would think that the detainee in cell A-8 had been dead at least 30-40 minutes, before I found him.

When we got to the DET Clinic, we had to beat on the door to get someone to answer. I helped put the detainee on a bed in the clinic and the staff seemed to just stare at first like they didn't know what to do. I heard (b)(3), (b)(6) get yelled again and got two stretchers from the DET Clinic. (b)(3), (b)(6) carried one stretcher and I carried the other. When I got back to Alpha block cell A-12 detainee was gone and I started helping with the detainee in cell A-5. I don't remember much about the detainee in cell A-5, but I do believe his eyes were wide open. I did not touch his body.

One interesting thing I remember and (b)(3), (b)(6) also noticed it was that on 09Jun06 and on the 1<sup>st</sup> day that the riots started several months ago the detainee in cell A-48 refused to eat. He stated to MA3 (b)(3), (b)(6) the first time this happened that he gets stomach aches when something bad is going to happen.
